

INDERASH M

ASPIRING SOFTWARE ENGINEER

minderash@gmail.com | +91 6382860929 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Aspiring **Full-Stack Developer** proficient in **Java, Python, MERN Stack, SQL, REST APIs, and Git**. Recognized as a **Smart India Hackathon** shortlist candidate and **National finalist**, with hands-on experience building architectures like **HumanHub** and **Blockchain** systems. Enthusiastic about engineering **AI-driven applications** and integrating intelligent automation into web design. Eager to apply these technical skills and fresh innovation to drive value within a forward-thinking organization.

TECHNICAL SKILLS

- | | | | |
|----------|------------|-----------|--------------|
| • Java | • React JS | • Node JS | • Express JS |
| • Python | • Rest API | • SQL | • Git/GitHub |

PERSONAL PROJECTS

HumanHub: AI-free Social Platform

Technologies Used: React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Engineered a human-centric social networking application focused on authentic user engagement by designing automated detection layers to explicitly filter out AI-generated content, deepfakes, and automated bots.
- Developed secure user authentication pipelines using JSON Web Tokens (JWT) and React Context API, ensuring encrypted profile management and a 100% human-verified user database.
- Optimized real-time interaction features including continuous timeline feeds, instant user actions (posting, liking, commenting), and dynamic community spaces with seamless backend routing.
- Architected a robust MERN stack backend to process high-volume metadata check filters and verification workflows, ensuring database schema reliability in MongoDB.

Blockchain-Based Blue Carbon Platform

Technologies Used: Solidity, Web3.js / Ethers.js, React, Node.js, Tailwind CSS, Hardhat

- Architected a decentralized environmental-tech platform for the transparent monitoring, reporting, verification (MRV), and immutable ledger logging of ocean and coastal carbon credits.
- Authored and deployed secure Smart Contracts using Solidity to automate the minting, compliance auditing, and distribution of verified blue carbon assets directly to stakeholder wallets.
- Integrated Web3 wallet connection protocols using Web3.js/Ethers.js, eliminating third-party intermediaries and enabling secure, fraud-resistant peer-to-peer carbon credit trading.
- Designed an interactive analytics dashboard in React to track and visualize complex environmental carbon sequestration metrics and long-term data projections.

Personal Portfolio Website

Technologies Used: React, Tailwind CSS, Vite, Vercel

- Designed and deployed a highly responsive, single-page application (SPA) to showcase software engineering projects, technical skill matrices, and coding architectures to recruiters.
- Implemented a modular, decoupled component architecture using React and Vite, optimizing asset bundling and resource loading speeds for an enhanced user experience.

AWARDS & ACHIEVEMENTS:

Institutional Pre-Qualifier | Smart India Hackathon (SIH)

Project Matrix: Blockchain-Driven Environmental Auditing & Blue Carbon Tracking

Key Achievements:

- Spearheaded the architecture design and technical positioning of a decentralized ledger solution solving complex national sustainability bottlenecks.
- Secured top tier ranking during institutional screening rounds, outperforming multiple peer teams to gain nomination for the national showcase.

Finalist | 24-Hour National Hackathon

Project Matrix: Real-Time Blood Bank Allocation & Emergency Inventory Routing System

Key Achievements:

- Successfully engineered and pitched a functional, data-driven web MVP within a high-pressure, 24-hour rapid prototyping sprint hosted across Nehru and KPR campus divisions.
- Designed integrated real-time data update pathways to streamline critical emergency requests and solve resource availability discrepancies.

CERTIFICATION:

- Full-Stack Web Development Certification | HackerRank
- SQL Skill Certification | HackerRank
- Web Development Graduate Certificate | Naan Mudhalvan (NM) Skill Initiative

EDUCATION:

KPR College of Arts Science and Research,
BSc Computer Science with Data Analytics
Coimbatore CGPA - 7.2

June 2025 – May 2027

SOFT SKILLS:

- Self-Learning Ability
- Goal-Oriented Focus
- Collaborative Mindset
- Emotional Intelligence
